

Book Performance Report 2017

April 2018

Dear Shashi Shekhar,

This report provides you with an overview of how your eBook performed on SpringerLink in 2017. We would also like to share some tips and services for you.

You might be familiar with Bookmetrix, a platform that compiles performance metrics for your books/chapters. Last year we **connected Bookmetrix to your MySpringer account**. While this report shows static, calendar-year data, your account shows you *current* SpringerLink usage data as well as the number of citations, social media mentions and book reviews.

Clicking on one of these metrics takes you to the Bookmetrix page for your book where you can find **benchmarks: how your book compares to the average of other titles published in the same year and discipline**.

Just a reminder, you can access MySpringer [here](#).

Best wishes,

Your Springer Marketing team

(ebook)

ISBN 978-0-387-30858-6
(print book)

Availability of and results for your eBook

Since its online publication there has been a total of **192,918 chapter downloads** for your eBook on SpringerLink. The table to the right shows the download figures for the last year(s).

This means your book was one of the **top 25% most downloaded eBooks** in the relevant eBook Collection in 2017.

- To further widen the distribution of your eBook, it has also been made available in the following shop(s):
Apple iTunes

eBooks reach a broad readership and provide global visibility for your work.

Year	Chapter Downloads
2017	32,384
2016	22,066
2015	37,244
2014	20,166
2013	29,311
2012	7,946
2011	8,623
2010	11,227

Spreading the word about your book

To present your book **Encyclopedia of GIS** to its potential readers and make it findable by search engines, it has its own **home page**, which can be **shared through social media** and where you can download a flyer for your book!

From the reviews:

From the reviews:

"This single-volume reference work is a highly welcome ... addition to the rapidly advancing field of geographic information systems. Peer-reviewed entries from over 300 contributors cover 41 topical subfields, with an overall emphasis on computational aspects of GIS. The volume is adequately illustrated with 723 figures and 90 tables in black and white. A full bibliography and concise list of entry terms are provided at the back of the work. ... Summing Up: Highly recommended. Upper-division geography students through professionals." (C. E. Smith, CHOICE, Vol. 45 (11), 2008)

"The encyclopedia is divided into 41 fields, each one an important sub-area within GIS. ... the editors' organization of the material and comprehensive and systematic approach are superb and shall give students, eager readers as well as researchers an understanding of the topics in quite full depth and breadth. ... is lavishly illustrated with figures, graphs and tables, the design and execution of which are as perfect as the material they illustrate. ... it is sturdy and opens out nicely for study and reference." (Current Engineering Practice, 2008)

"The focus here, however, is on the mathematical and computational aspects of GIS ... This is very welcome to those practitioners who have been less exposed to some of the mathematical and computational aspects of GIS. This is also very welcome to the researcher or graduate student within any of the interdisciplinary areas that use GIS. ... I highly recommended it." (Pascal V. Calarco, ACM Computing Reviews, November, 2008)

Tips and services

Engage on social media – talk about your book

Are you an active social media user? Remember to talk about your book and share the link to your book with your community. What inspired you to write it? How many downloads did it get last year? Posts about your book can reach potential new readers, and help get it cited and get more reviews.

Find a Springer social media account in your discipline and connect with your community: springer.com/social-media

Download your author badge

Download it and stick it to your website, post it on social media or place it in your email signature and hyperlink it to your book. Use your author badge to promote your book.

Open access books and funding options

We publish open access books in science, technology, medicine, the humanities and social sciences. Publishing an open access book with us leads to seven times more downloads, 50% more citations and ten times more online mentions on average than publishing a book through the non-open access route. We offer a variety of book types including monographs, edited volumes, proceedings, SpringerBriefs and chapters. In addition to the electronic version, customers can order a printed edition at a reduced rate. Authors retain copyright. The default Creative Commons Attribution (CC BY) 4.0 International License facilitates free re-use and sharing.
